Surgically Facilitated Orthodontic Therapy (SFOT) A Periodontist’s Perspective

**Dr. George Mandelaris**

Patients that want more ideal facial esthetics and function, may choose to have the interdisciplinary team utilize SFOT to alter the dentoalveolar bone and optimally position the roots of the teeth for the patients’ face. Surgical, orthodontic and restorative perspectives will be presented to challenge the team to move beyond traditional interdisciplinary therapies into a new frontier for enhanced outcomes.

Optimizing Perio-Ortho Treatment Outcomes

**Dr. Bradley McAllister**

Diligent interdisciplinary case planning often includes a pre-treatment CBCT to perform a periodontal risk assessment and to determine implant options if included in the treatment plan. This presentation will review pre- and post-orthodontic strategies that include connective tissue grafting, esthetic crown lengthening, decortication, bone grafting, and implant placement for anchorage and/or restorative needs.

Medical Urgencies & Emergencies in the Dental Office

**Dr. Michael Mashni**

A review of the common and the severe urgencies and emergencies and how to manage them.

Anesthesia Regulations in California: How Did We Get to This?

**Dr. Michael Mashni**

A review of the latest changes in the statues and requirements for sedation and how we got here.

The Grey Zone: Extending the Range of Healthy Orthodontic Tooth Movement

**Dr. David Forbes**

Orthodontic patients are evaluated for treatment using multiple parameters. Of particular importance is the determination of the skeletal bases and their relationship to the dentoalveolar complex. The presenter will distinguish the parameters limiting the orthodontic movements and reveal how to treat both Class III and Class II surgical (grey zone) cases without orthognathic surgery and retain a healthy periodontium.

Piezocision Assisted Orthodontics: Expanding Your Treatment Options

**Dr. Serge Dibart**

Piezocision may offer a substitute for complete corticotomies in less severe cases requiring Surgically Assisted Rapid Palatal Expansion. Piezocision may offer a substitute for complete corticotomies in less severe cases requiring Surgically Assisted Rapid Palatal Expansion. It helps in distalization of molars, intrusion of molars, correction of open bites, may provide a mechanism to treat challenging cases successfully in an “unconventional” manner.

Treating the Patient with High Levels of Dental Anxiety and Fear

**Dr. Larry Trapp**

This presentation will review management of the fearful dental patient.

Oral Sedation in the Periodontics Practice

**Dr. Larry Trapp**

A review of oral “minimal” sedation protocol and regulations.
