Membership
HIGHLIGHTS

Newsletter

The *Periodontal Advocate* newsletter is the written voice of the California Society of Periodontists.

The editorial content is unlimited in its scope and its relevance to Periodontics and Implant Dentistry. This is an important and effective medium to inform members how their dues are spent and what CSP is doing for the membership. We publish four issues per year. The focus is on legislative activities, educational offerings and other issues that affect the profession and practice of periodontics.

Advocacy and a Voice

CSP is the largest and most active of all the state and regional periodontal organizations in the country. We are one of the few state specialty organizations to have our own executive director, quality annual meetings, and an active board that advocates your rights to practice the way you want in spite of pressure from other specialties and legislature demands.

Join CSP and make your voice heard and help us make the voice of periodontists louder!

Oral Health Expert

The CSP newly designed consumer oriented website will help get patients to your office. Members are provided an opportunity to list their practice information, web address and other details at no additional cost.

The CSP consumer site promotes the CSP member periodontist as the expert in oral health care, periodontics and implant dentistry.

The CSP's member website provides timely information on the issues that affect your practice and patients. The website has resources to help your practice, including patient consent forms, AAP position papers and other important information. The site also provides information on the CSP annual meeting, the CSP PHCs, and the regional meetings to elevate your education and keep you informed.

Continuing Education

Annual Meetings: CSP members enjoy a reduced fee to the CSP annual meeting which is typically held in the spring at a beautiful resort somewhere in California.

The education is exceptional and includes nationally and internationally recognized speakers. The annual meeting event is a great place to network with other periodontists. Conscious sedation review topics are included in every annual meeting.

The programs are often collaborative in nature designed for the member periodontist and their referring general dentists to build on the team approach concept to patient care.

Perio-Hygiene Collaboratives (PHC): Only CSP members can attend the CSP Perio-Hygiene Collaborative. The goal is to educate hygienists and promote the periodontist as the leader of the periodontal team. CSP members that have sponsored RHDs in the PHC report an increase in referrals following the seminars. PHC seminars are held numerous times in the year.
